Hot task: flanimal.

Sprot Guzzlor

Introduction

The Sprot Guzzlor live in a cold and warm climate. I hunt for Hemel Sprots and got a snake like tail and is terrified of adult Memimbers. lives in a cold peas of wood. His ansester is a Snail.

Evolution: Eye

His pointy eye hang of his slimy skin these help him hunt for food particularly hemle sprots they shen in the bright sun.

Evolution: teeth.

His water watery drool oze grew through his crooked teeth were Hemel sprots that are stuck in his teeth.

Evolution: Arms

There worm like karm wrinkle through there thingere. They mutated to have shorter arm they use to have long Arm.

Evolution: tail

There long tail follow through the There wood home and help his crooked spine. They evolved over time to make the tail more usefull.
